

XTENSIBLE SOLUTIONS

KNOW AND UNDERSTAND YOUR DATA TO DRIVE BUSINESS VALUE

MEET THE CHALLENGES OF BEING THE UTILITY OF TOMORROW - TODAY!

Today's utility enterprise is faced with an increasing demand for real-time integration, process automation and data insights. Smart Grid technology, the emergence of micro grids, residential generation and the growing possibilities around storage all have a single commonality: the data.

How are you going to use your data, manage it and generate insights from it? How does it flow through your organization and what does it mean?

Let Xtensible Solutions help you develop a consistent layer of data and services across the enterprise. With nearly two decades of full focus in the utility industry combined with our MD3i Framework methodology and toolset we can help you drive business value and growth from your data!

Tornado of Data

-  Defined
-  Relevant
-  Irrelevant

Drive Business Value and Growth

What is your strategy?

What is the use case, business process and business value?

Do you know and manage your data?

How well is your data integrated?

What is the Reference Architecture for building?

Business Value and Insights

Business Insights

Financial and Service Growth

OUR FOCUS IS THE UTILITY INDUSTRY

Industry Standards

Industry standards are essential to enabling open and interoperable solutions for utilities' business solutions such as AMI, DMS, OMS, DRMS, GIS, WMS and other smart grid initiatives.

Through the use of international standards, solutions built with interoperability in mind reduce the risk and cost of implementation and ownership.

Xtensible Involvement in Standards

Members of the Xtensible team lead and participate in over 30 different smart grid-related standards development efforts. We leverage best practices and our expertise in the application of standards into Xtensible's consulting and systems integration services, thus providing utilities with unparalleled solutions.

XTENSIBLE SERVICES: SUPPORTING BOTH BUSINESS & TECHNOLOGY

Know & understand your data to drive business value

PROJECT MANAGEMENT

- Business Process Improvement
- Use Case Development
- Requirements
- Implementation
- Management
